Education

Technical University of Munich (TUM) — Munich, Germany
M.Sc. Computer Science; ***1.3 (preliminary)*** — *Oct 2024 – Jun 2027*
- Relevant Coursework: Advanced System Programming, Modern Query Engines, Concepts of C++, Deep Learning

KTH Royal Institute of Technology — Stockholm, Sweden
Exchange — *Jan 2026 – Jun 2026*
- Relevant Coursework: Distributed Systems, Network Systems with Edge or Cloud Datacenters

Technical University of Munich (TUM) — Munich, Germany
B.Sc. Computer Science; ***2.2*** — *Oct 2020 – Aug 2024*
- thesis: Statically Detecting Buffer-Overruns for Dynamically Allocated Memory
- math minor: Analysis 3, Introduction to Data Science and Statistical Thinking, Introduction to Optimization

Skills

Languages: C, C++, Java, Kotlin, Python, TypeScript, SQL

Technologies: Flask, Vue3, React.js, Docker, Kubernetes, GCP, Terraform, Helm, Spring Boot, Quarkus

Experience

Rohde & Schwarz — Munich, Germany
Full Stack-Developer (Intern → Working Student) — *June 2026 – Present*
- Maintaining and further developing a full stack application
- Deploying services to a Kubernetes cluster using Helm charts
- Finding and fixing bugs and improving test coverage across backend and frontend

Deutsche Bank — Berlin, Germany
Full Stack-Developer — *Aug 2025 – Dec 2025, Internship*
- Developing a full stack application and deploying it to a GKE cluster by using terraform, helm charts and github workflows
- Developing the backend using Spring Boot and Kotlin
- Developing a user friendly frontend using NextJS

Senior Connect — Munich, Germany
Interdisciplinary Project — *Apr 2025 – Jul 2025, Internship*
- Developing an conversational AI preparation tool using the Gemini API and Livekit API
- Developing a user friendly frontend application using NextJs using Firebase
- Developing backend in Flask (Python) with type safety using Marshmallow and Pydantic
- Writing unit and integration tests for backend

CHECK24 Vergleichsportal — Munich, Germany
Fintech Summer Internship — *Aug 2024 – Sep 2024, Internship*
- Analyzing and planning the migration from an old monolithic code base to a micro service
- Designing and implementing a new micro service using Spring boot and writing unit tests
- Deploying the application to a Kubernetes cluster utilizing Jenkins

AOK Bayern - Die Gesundheitskasse — Munich, Germany
Data Engineer — *Oct 2023 – Apr 2024, Part time*
- Integrating new process mining analysis in the system
- Further development of existing process mining analysis
- Determination and analysis of data sources in the SAP-System and adaptation of data models

Clerical Assistant — *Jun 2021 – Aug 2022, Part time*
- Implemented a SAP GUI Script to automate processing balance sheets
- Processing refunds and updating customer information in SAP

Hackathons & Competitions & Projects

HackaTUM 2024: Optiver Built an Arbitrage trading bot

HackaTUM 2023: Jetbrains Built an IntelliJ Plugin using LLM refactoring variable names

HackaTUM 2022: Huawei Built Android App improving Openstreet pedestrian data using RL model

Turnierplaner: Fullstack application to manager tennis tournaments built using Vue3, Quarkus, Docker

Wintercontest: Competitive programming Ranked TOP 10 in Germany and TOP 3 at TUM

Hobbies

Running Marathon runner

Bouldering Solving Problems for 3 years now

Weight Lifting

Chess Elo of around 1800 on Lichess
